

## PlanTick - Ensure Successful Deployment of Tick-the-Code

Software developers produce return on training investment each time they tick some code. The goal of an organization is to make sure that all trained software developers start using **Tick-the-Code** in their work and turn it into a regular habit. Every organization is different. In PlanTick the management plans the immediate deployment with the trainer. The session answers questions like, how the managers can support their subordinates in using **Tick-the-Code**, how that support should manifest itself, and do you need written guidelines? In short, PlanTick creates a **Tick-the-Code** deployment plan for the first two to four weeks after the developer training.

### Target Audience

Quality manager, project managers, team leaders or other right software managers and developers needed to make an effective deployment plan.

### Objective

The participants create a practical and feasible plan on how to deploy **Tick-the-Code** in the organization.

### Prerequisites

The participants should be familiar with **Tick-the-Code**.

### Duration

The planning itself takes, depending on the conversation and questions, up to 2 hours.

### Class Size

Effective planning meetings have less than 6 participants.

### Moderator

Miska Hiltunen moderates the session.

### Language

The session language will be English, Finnish or German.

### Location

The session takes place in-house.

### Topics

At least the following subjects need to be covered in the session:

- Practical arrangements (printing, distribution, metrics)
- Key people
- Ticking period
- Reporting (presenting results, collecting them)
- Incentive system
