

PoliTick - Everything about Tick-the-Code and Quality for Managers

Software developers can use **Tick-the-Code** on their own, but with proper management support their contribution can be much more valuable. PoliTick aims at answering the question: “How do I, as manager, best support my **Tick-the-Code** -enabled software developers?” There are things you need to understand about **Tick-the-Code** but there are also general quality issues to discuss, because introducing **Tick-the-Code** requires a paradigm change when it comes to quality.

Target Audience

The session is aimed at software managers who don't know **Tick-the-Code** but whose people do.

Objective

The course gives enough information to the participants to understand what **Tick-the-Code** as a skill means. After the course, the participants are in a better position to support the **Tick-the-Code** practitioners.

Prerequisites

The participants need not be familiar with **Tick-the-Code**.

Duration

Depending on the conversation and questions, up to 2 hours.

Class Size

There is no restriction.

Moderator

Miska Hiltunen presents, and moderates the session.

Language

The session language will be English, Finnish or German.

Location

The session takes place in-house.

Topics

- Challenges of Quality
 - Quality as Delay (Critical Mass)
 - Window of Opportunity
 - Urgency and Importance Are Not the Same
 - Vicious Circle of Busyness
- Support in Practice
- **Tick-the-Code**: Summary
- We're All in the Same Boat (Testing is no Final Solution)
